

# R55 Series – Desktop Trackball, USB & PS/2 Output

#### 1. DESCRIPTION

The R55 Series is a professional desk top trackball designed for precise cursor control over prolonged periods of use. Constructed from high impact plastic, and featuring robust mechanics, it is ideally suited for use where reliability and extensive life span are prerequisites.

The module is supplied with three integrated switches which provide the conventional left, middle and right button functionality found in commercial trackballs/mice.

The trackball can be directly connected to any personal computer via the USB or PS/2 port.

#### 2. FEATURES

- Outputs: USB & PS/2 (auto select)
- · Smooth and accurate operation in rugged environments
- Constructed using high grade stainless steel shaft and bearings for precise control
- Various ball colours available
- VX3<sup>™</sup> integrated zoom feature for scroll wheel functionality
- PC and Mac compatible

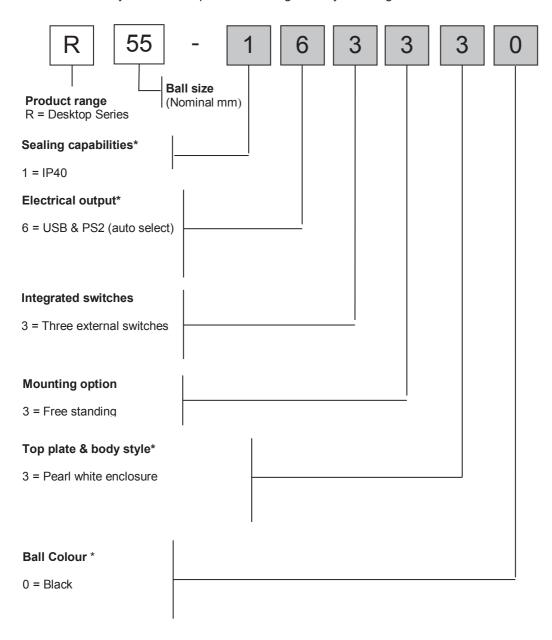

## 3. APPLICATIONS

- Control systems
- Medical systems
- Marine systems
- Navigation systems
- Industrial consoles
- OEM custom solutions available
